

CCS Technical Lead

Interim consultant would be considered to bridge the gap between now and finding someone on a permanent basis

TAQA Energy is involved in the exploration, production, transportation and storage of oil and natural gas in the Netherlands. As a 100% subsidiary of Abu Dhabi National Energy Company (TAQA), an independent water and power company with the state of Abu Dhabi being its major shareholder, TAQA Energy B.V. together with TAQA's subsidiary company in the United Kingdom, acts as a vehicle for growth in Europe. TAQA Energy operates on and offshore production installations and the Alkmaar Peak Gas Installation (PGI) which stores and delivers gas to the Dutch national grid to help meet high demand for energy during the winter months. Together with the Dutch state TAQA is planning to invest €800 million in realizing the Bergermeer Gas Storage facility, Europe's most advanced and largest third party access gas storage facility, near Alkmaar. Once complete it will provide a reliable seasonal supply of natural gas and form part of a broader energy infrastructure for North West Europe.

TAQA has the following vacancy in the Netherlands:

Description

The CCS Technical Lead is the coordinator and focal point of all CO₂ storage technical related activities as part of the ROAD CCS demonstration project. This includes coordinating input from various disciplines, Facilities Engineering, Process Engineering, Reservoir Engineering, Drilling, Well Completions and Geophysicists. Other duties include coordination of permitting activity, input to support commercial business case, day to day project control and billing and reporting project progress to TAQA Management Team, project partners and following Project FID externally as well. The Technical Lead has technical and commercial skills and is able to organize the project and report to stakeholders.

Roles and Responsibilities

Project Management

- Deliver Storage location of ROAD CCS demonstration project, represent TAQA on ROAD project team and OPSCOM
- Report to stakeholders, management team, head quarters and partners
- Set budget with ROAD partners
- Liaise with TAQA Energy Operations, Commercial, Engineering, FC&A, Legal, Regulatory and Procurement disciplines for assurance

Technical Project Lead

- Lead Facilities Engineering: Set Scope of Work for Platform FEED (Offshore Brownfield Platform Modification), Manage contractor FEED study and interface within ROAD CCS demonstration project to deliver safe design
- Coordinate Subsurface Work: Coordinate reservoir & well engineering both internal and external to TAQA
- Set contracting strategy for EPC phase
- Deliver design compliant to license and permits and approved by competent authority
- Liaise with Operations, Engineering and Procurement for assurance

Other

- Commercial: Updating the Business Case, budgeting, cost control and invoicing
- Assisting the ongoing permitting process. Act as TAQA regulatory rep and feed the permitting process with technical input

Business Qualifications

- MSc level qualification in engineering
- Several years working experience as project or facility engineer or technical lead in the offshore oil and gas industry preferably on brownfield platform modifications
- Natural facilitator with strong influencing skills required to maintain relationships with a range of contacts inside and outside TAQA

Skills and Competencies

- Comfortable coordinating input from and between multiple disciplines (technical, subsurface, legal, regulatory, commercial and able to report to management)
- A strong delivery track record and demonstration of an ability to overcome obstacles and adapt approach is essential
- Understanding of Reservoir and Well Engineering would be beneficial
- Excellent presentation and communication skills
- General business understanding
- Self-starter combined with determined completion skills
- Tendering and Contracting experience
- Flexible and multitasking
- Fluent in Dutch and English

Remuneration

TAQA is an international company offering its employees opportunities for career development both locally and internationally. Besides a challenging and interesting working environment, we offer a competitive salary and benefits package. TAQA encourages and supports training and development of employees.
