

Project Director Bergermeer Gas Storage

TAQA Energy B.V. operates on- and offshore installations of oil and gas production and storage in the Netherlands. As a 100% subsidiary of Abu Dhabi National Energy Company (TAQA), an independent water- and power company with the state of Abu Dhabi being its major shareholder, TAQA Energy B.V. together with TAQA's subsidiary company in the United Kingdom, acts as a vehicle for growth in Europe. Future TAQA activities in the Netherlands will be focused on E&P upstream and midstream.

Currently, TAQA Energy B.V. and its partners are in the initial project phase of rebuilding the almost depleted Bergermeer gas field into an underground storage facility. TAQA Energy B.V. has a strong ambition to grow the asset base in the Netherlands by developing new fields and actively acquiring additional assets.

TAQA Energy B.V. has offices in Alkmaar and The Hague and offers flexibility in working hours and location.

Function Description

The Project Director Bergermeer Gas Storage (BGS) will lead the Project Team and is accountable for sanctioning and delivery of major capital oil and gas projects. He/she reports directly to the Managing Director and plays a crucial role in shaping the future of the company. He/she is a result-oriented professional who is able to operate independently in the dynamic oil and gas sector (both upstream and midstream). The main function objective is to ensure that meticulous attention is paid to every aspect of the Project through development, permitting, execution, completion/hand-over and close-out.

Roles and Responsibilities

The project Director is accountable for the following areas of responsibility:

- Obtaining all necessary permits to commence the construction of the BGS project
- Delivery of the BGS project within budget and on schedule
- Lead the project team and strives to maintain the progress and productive mutual interaction of various parties
- Communicate overall project performance metrics to the Management Team and Project Partners
- Business development and economics
- Stakeholder Communication, internal and external
- Develop and maintain the project organisation fit for purpose for the BGS project
- Technical design specification and verification
- Contracting & Procurement Strategy
- Financial planning, cost control, budget preparation, cost estimate and Project Schedule

- Risk Management model and risk register, Project Control and Reporting and Legal and Corporate Compliance

HSSE

The project Director is accountable that:

- All work in the BGS project team is carried out according to the TAQA HSSE policy
- The design of plant and machinery is “Best Available technology (BAT)” and complies with both TAQA and local and international guidelines with respect to “Best Practice”
- All work is executed according to all applicable laws and regulations
- Adhere to measures indicated in the specific risk analysis such as a TRA
- Attend safety, kick off and tool box meetings and contribute to those if requested
- Support incident research and contribute to those if requested and ensure timely follow up

Business Qualifications

- MSc Mechanical, Civil or Petroleum Engineering
- > 15 years wide range experience: technical, business, commercial, project management
- Relevant experience leading large and complex projects

Skills and Competencies

- Strong technical background at academic level preferably with Oil and Gas, Energy or Petrochemical experience
- Leader, excellent communicator in both Dutch and English, team motivator
- Able to work under pressure, communicative, diplomatic
- Experience with underground gas storage is an advantage
- Strong analytical skills and able to prioritize under pressure
