

Project Quality Assurance / Quality Control (QA/QC) Engineer

TAQA Energy B.V. operates on- and offshore installations of oil and gas production and storage in the Netherlands. As a 100% subsidiary of Abu Dhabi National Energy Company (TAQA), an independent water- and power company with the state of Abu Dhabi being its major shareholder, TAQA Energy B.V. together with TAQA's subsidiary company in the United Kingdom, acts as a vehicle for growth in Europe. Future TAQA activities in the Netherlands will be focused on E&P upstream and midstream. Currently, TAQA Energy B.V. and its partners are in the initial project phase of rebuilding the almost depleted Bergermeer gas field into an underground storage facility. TAQA Energy B.V. has a strong ambition to grow the asset base in the Netherlands by developing new fields and actively acquiring additional assets.

TAQA Energy B.V. has offices in Alkmaar and The Hague and offers flexibility in working hours and location.

Function Description

Assists the Project HSSEQ Manager with setting up a project QA/QC system, which includes coordination with NoBo's to meet European Legislation (CE Marking and NEN 3650) and develop/implement a hand-over system to the Assets during Pre-Ops (Commissioning Phase)

Interface with project team members and key people in the Asset.

Roles and Responsibilities

- Ensuring engineering and manufacture processes are implemented in line with national standards and that work is conducted in accordance with approved quality plans.
- Ensure Quality Documentation is up to date, relevant for any work related to the Bergermeer facilities including drilling.
- Supervise and Co-ordinate the project quality work through all phases of the project from design construction installation and handover.
- In conjunction with Discipline Engineers determine "HOLD", "WITNESS" points on Vendor/ (sub) Contractor inspection Quality Plans.
- Ensure that inspection services are available for the work as required in conjunction with EPCm Contractors.
- Determine schedule of audits for main contractors for quality management systems.
- Arrange for Quality Audits to be carried out on Contracts.
- Review/Audit Internal project procedures to ensure all persons are aware of (and operating to) procedures. Plan / prepare and carry out internal and external audits.

- Follow up of correcting actions from audits to ensure planned close out dates are met.
- Participate in the developing and evaluating ITT for (Sub) Contractors.
- Monitor and approve Contractor's Quality Control system at worksites and hand-over systems
- Develop and implement a Hand-over system with Assets to turn over the plant to Assets.
- Liaise with NoBo for PED and CE marking of the facilities and pipelines

HSSE

- TAQA place HSSE as a high priority which are reflected in the applicable HSSE Policies, regulations and standards for the WORK location or office you will be working, therefore TAQA expects a positive attitude towards HSSE.
- Report deviations, unsafe acts, incidents and unsafe conditions immediately to the team leader or HSSE representative.

Business Qualifications

- Recognised degree in engineering (bachelor or master);
- Understanding of general project management;
- Understanding of Quality Assurance ISO 9001 requirements;
- Experience in Quality Control Inspections and systems in the Field and Manufacturers/Vendors;
- Experienced in performing internal/external Audits
- VCA Certified;
- Able to work under pressure;
- Pro-active and problem solving attitude;
- Demonstrated record and leadership in HSE.

Skills and Competencies

- More than 5 years experience in oil & gas projects including:
- Field Inspections;
- Experience with EPCm contractors;
- The ability to work as a part of a multi-discipline project team;
- Excellent communication skills;
- Required skills to prioritise HSE, Operational and Project related work to overall benefit of the Bergermeer gas storage project;
- Construction, commissioning and Hand-over knowledge and experience.

Other Information

The position requires part time presence in the EPC contractor offices during detailed design activities. Attendance is required during construction phases on the Bergermeer well site, Pipeline sites and Boekelermeer facility site near Alkmaar to support the Construction Manager.
